

And that's just what they were – high fliers!

The lady arrived after school on Friday to introduce Cheerleading – American style to the children. I left the children finishing tea and watching a DVD about the new after school club. I had to nip out of school and when I returned I was amazed to see children in the hall in action!

## High Fliers

The lady had them all sorted into groups with back stops, front stops and fliers. She counted them in and with a small sequence they managed to join themselves up and then launch the flier into the air! It was fairly amazing to watch and I think even astounded the children as to how, with the right moves and correct supervision, they managed to get their friends into the air.

The club, I understand, is full already and I can see it is going to be very popular – roll on September when, we were told, we should be able to begin entering competitions with the Brooke House team!
